

U-shaped EMI gasket

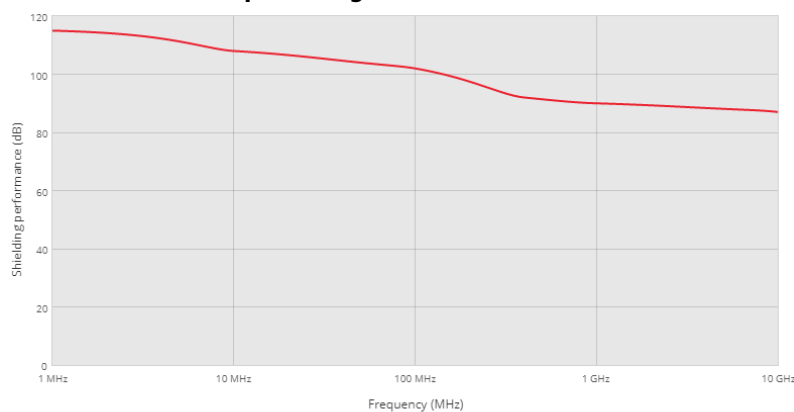

U-shaped EMI gasket 7600

Creates a positive seal between bottom of door/panel & threshold to block out weather, light, sound, insects and dust and also acts as an EMI gasket.

We have developed a U-shaped EMC gasket for doors and other types of panels where a U-shape can be attached. The U-shape allows opposing contact surfaces to enter the U-Shape opening while making three points of contact. For example for edge-mounting applications.

The U-shaped gasket creates a positive seal between the bottom of a door or panel and its threshold to block out weather, light, sound, insects, and dust. At the same time it acts as an EMI gasket. It is easy to assemble by sticking it onto the edge of the door or panel with the self-adhesive strip.

7600 series - U-shaped EMI gasket

Please note : These values are measured under laboratory conditions. Results may vary in other situations; please read our Guarantee.

Side view of product

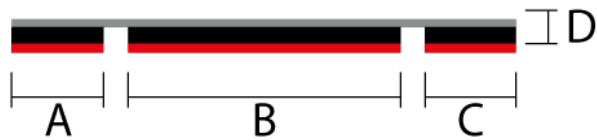

Optional (on request)

The U-shape can be made in different widths and heights per side. It is also possible to place a half rounded layer on top.

U-shaped EMI gasket

Standard part numbers

A	B	C	D (material thickness)	Part number
2	4	2	1	7600-2-4-2
4	6	4	1	7600-4-6-4
6	8	6	2	7600-6-8-6
8	10	8	2	7600-8-10-8
9	14	9	3	7600-9-14-9
11	16	11	3	7600-11-16-11
13	18	13	3	7600-13-18-13
15	20	15	4	7600-15-20-15
16	22	16	4	7600-16-22-16
18	24	18	4	7600-18-24-18

Other sizes on request

Series	Dimension A (mm)	Dimension B (mm)	Dimension C (mm)
7600	Specify dimension A in mm	Specify dimension B in mm	Specify dimension C in mm
