

5780 - EMI Flexible absorber sheets

The EMI flexible absorber sheets developed for electromagnetic wave absorber and noise suppression can eliminate noise effectively. You can solve EMC/EMI problems by attaching noise suppression sheets simply on the parts of noise sources.

Features and benefits

- Very flexible and easy to handle
- Can be delivered in any shape, size and/or thickness
- Optionally available as custom made tube
- Can be cut according to your supplied drawings
- Provide effective EMI suppression in a wide frequency range (10MHz to 18GHz)
- Change the magnetic flux path to avoid interference on other components or surrounding cables
- Reduce the eddy current when the magnetic flux is close to metal
- Non-conductive adhesive backing (UL Recognized) available
- Effective in preventing resonance and suppressing coupling
- High surface resistance (106 ohms)
- Easy and fast to process through self adhesive

Several types of flexible EMI absorber sheets

Flexible EMI absorber sheet is easy to bend around a cable (optional available as an tube)

Applications

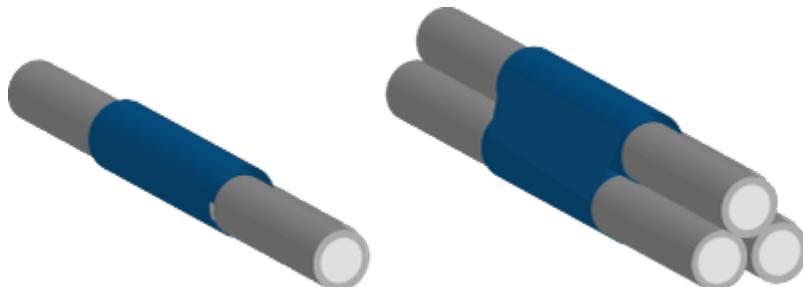

- RFID (Radio Frequency Identification) systems
- NFC (Near field communication)
- Wireless Power Chargers (WPC / Qi)
- Computers (NB / Desktop / Tablet) and peripherals Digital Products
- Mobile Phones / Smart Phones / Phablet
- Wireless equipments
- EMI Shielding Box / Dark Box
- Between printed circuit boards
- On ICs, processors, and controllers
- On cables that need high flexibility

Part number and characteristics

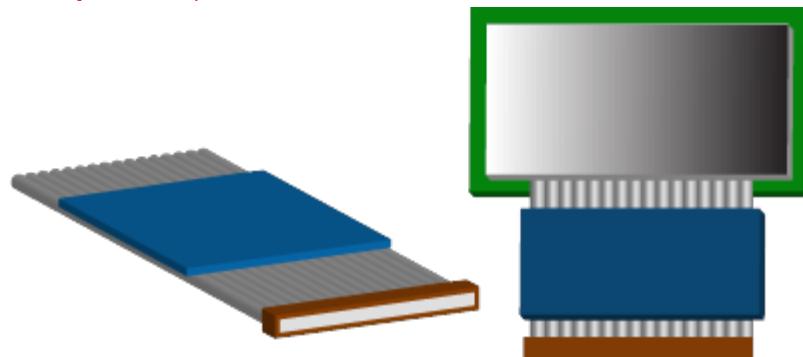

Properties	Unit	5780-C1	5780-C3	5780-C5	5780-C7	5780-C8
Operating Temperature	C	-40 ~ +85	-40 ~ +85	-40 ~ +85	-40 ~ +85	-40 ~ +85
Applicable Frequency	GHz	0.01 8.0	0.1 18.0	0.01 18.0	0.01 1.0	0.01 1.0
Relative permeability (@1MHz)	-	25	50	115	140	450
Material	-	Magnetic Powder + Rubber	Magnetic Powder + Rubber	Magnetic Powder + Rubber	Sintered Ferrite	Sintered Ferrite
Thickness Range	mm	0.12 - 2.50	0.25 / 0.50 / 0.75	0.05 - 0.50	0.08 / 0.12	0.12 / 0.22
Max. Dimension	mm	400 x 400	400 x 400	210 x 297 (A4)	130 x 130	130 x 130
Surface Resistance	Ohm	10 ⁶	10 ⁹	10 ⁶	10 ⁹	10 ⁹
Density	g/cm3	3.6	4.8	2.7	3.8	3.8
RoHS 2.0 Compliance	-	2011/65/EU	2011/65/EU	2011/65/EU	2011/65/EU	2011/65/EU
Halogen-Free	-	No	No	Yes	Yes	Yes

Usage examples

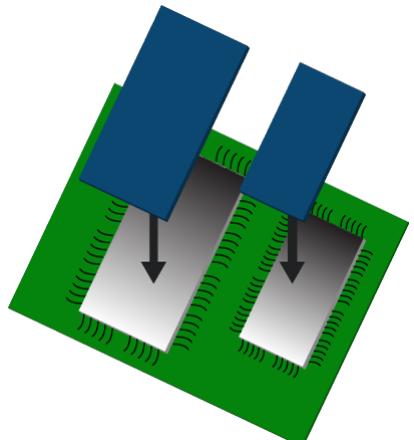

5780 - EMI Flexible absorber sheets

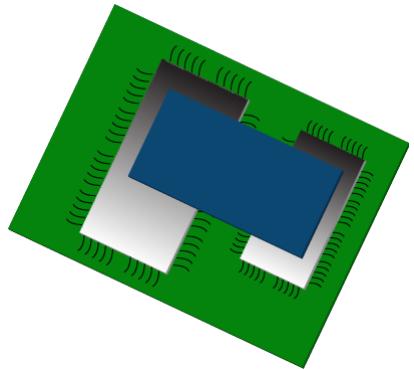

Example 1: Wrap around a cable

Example 2: Apply to flat cable

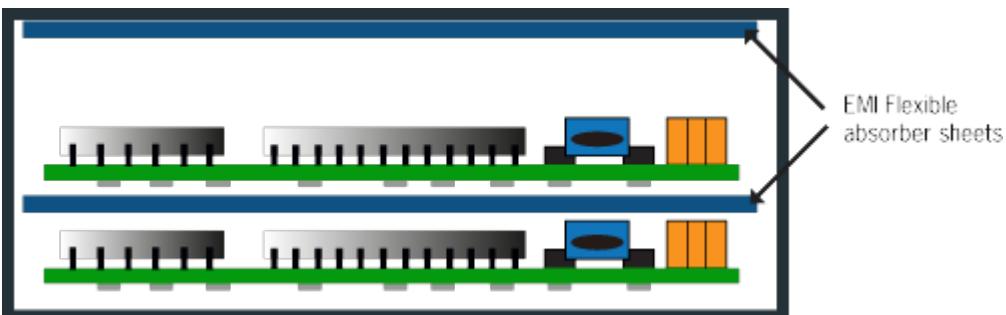

Example 3: Apply to a integrated circuit (IC) top

Example 4: Apply between integrated circuit

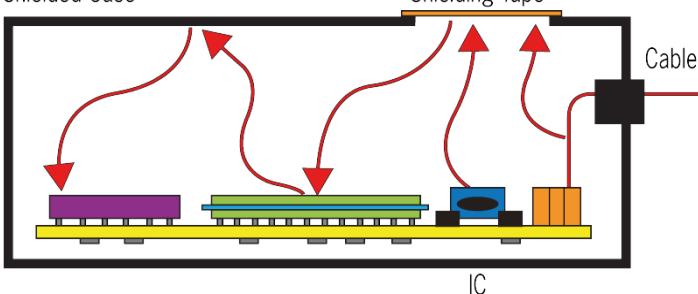

5780 - EMI Flexible absorber sheets

Example 5: Apply to case and between boards

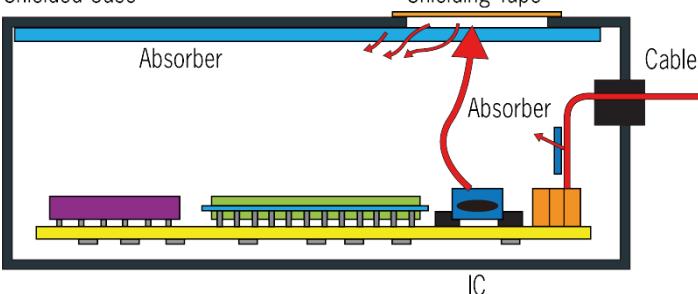

EMI enclosure solutions using only EMI shielding tapes or with EMI absorbers

SHIELDED CASE

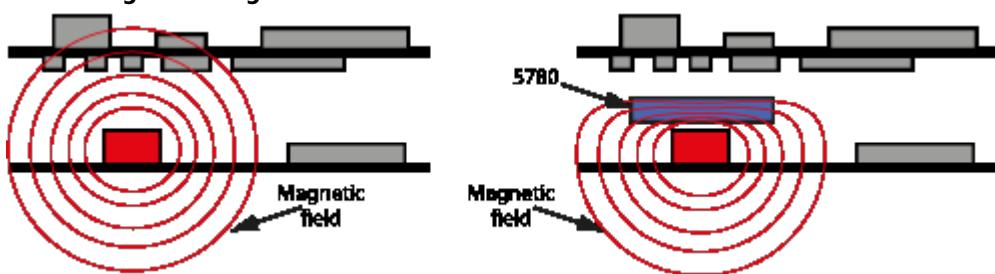

EMI enclosure solutions using only EMI shielding tapes

Shielded Case

Effect diagram - Magnetic shield

5780EMI Flexible absorber sheets can change the magnetic flux path to avoid the magnetic flux affect others components.

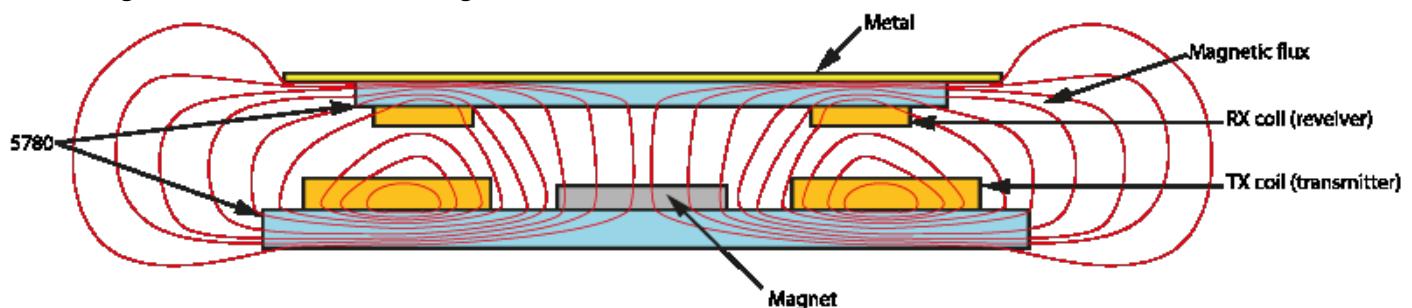

Effect diagram - RFID/NFC on metal

5780 - EMI Flexible absorber sheets

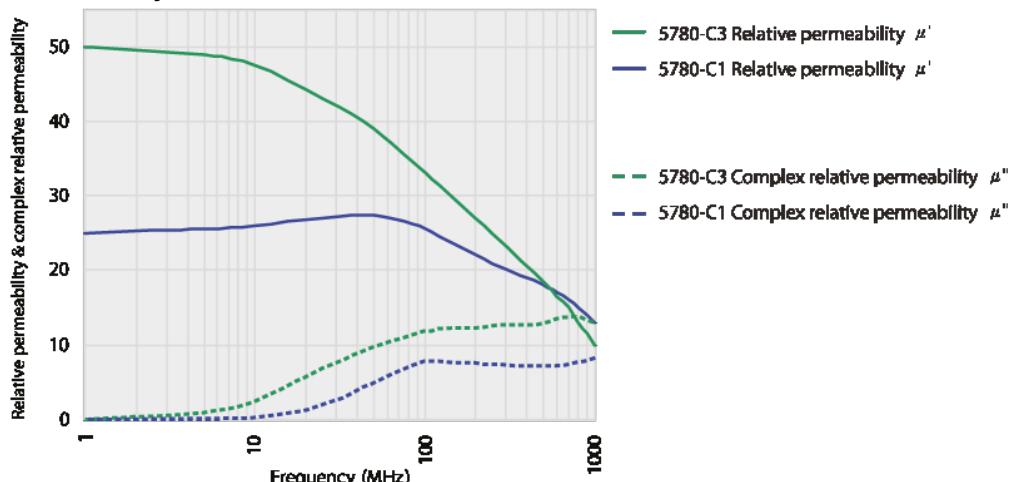

The magnetic flux induced eddy current and generated a reverse magnetic field to offset the magnetic flux to cancel the communication. After attached 5780 between metal and RFID antenna, the communication will recover.

Effect diagram - Wireless Power Charger

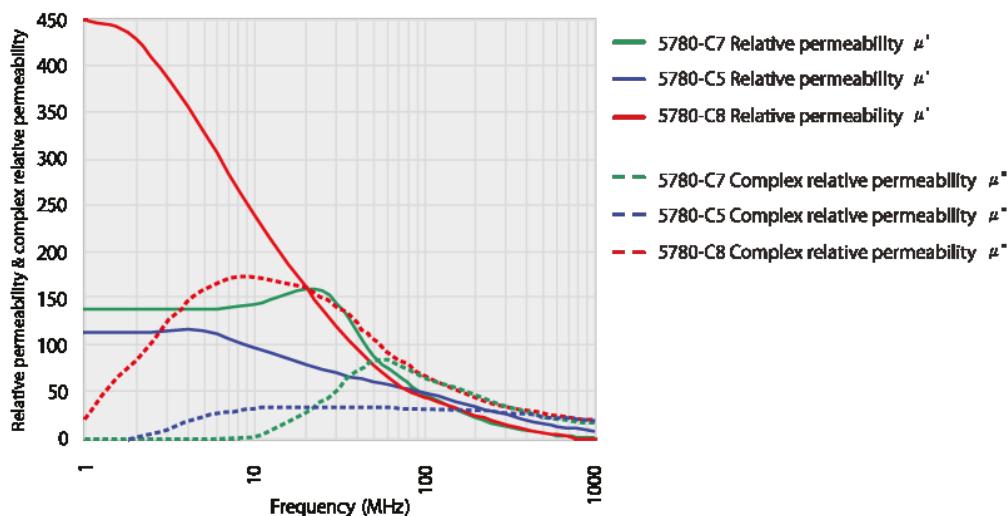

5780 EMI Flexible absorber sheets can be used for wireless power charger to avoid eddy current when RX coil attached on metal and change the magnetic flux path between TX coil, RX coil, magnet.

Permeability characteristics

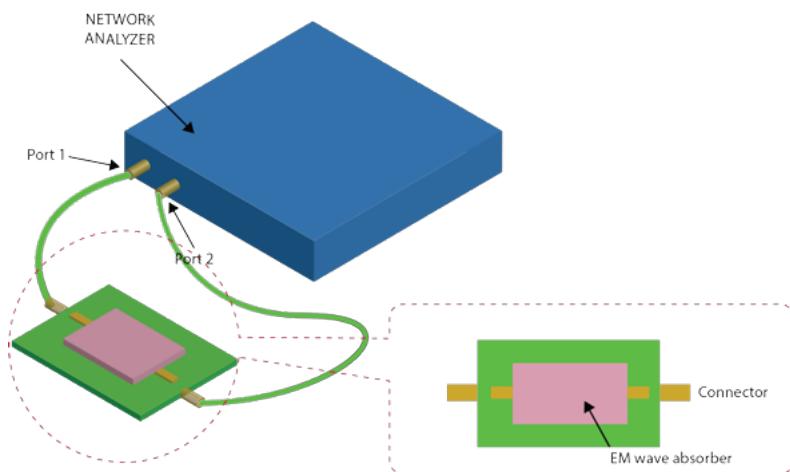

5780-C1, 5780-C3, 5780-C6 EMI Flexible absorber sheets permeability characteristics

5780 - EMI Flexible absorber sheets

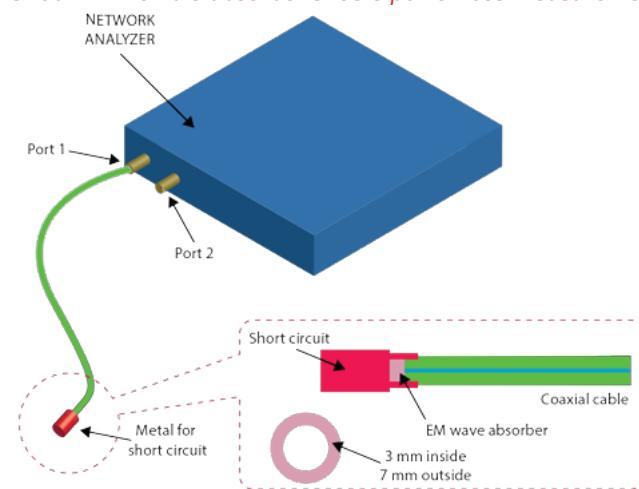

5780-C5, 5780-C7, 5780-C8 EMI Flexible absorber sheets permeability characteristics

Methods of measurement

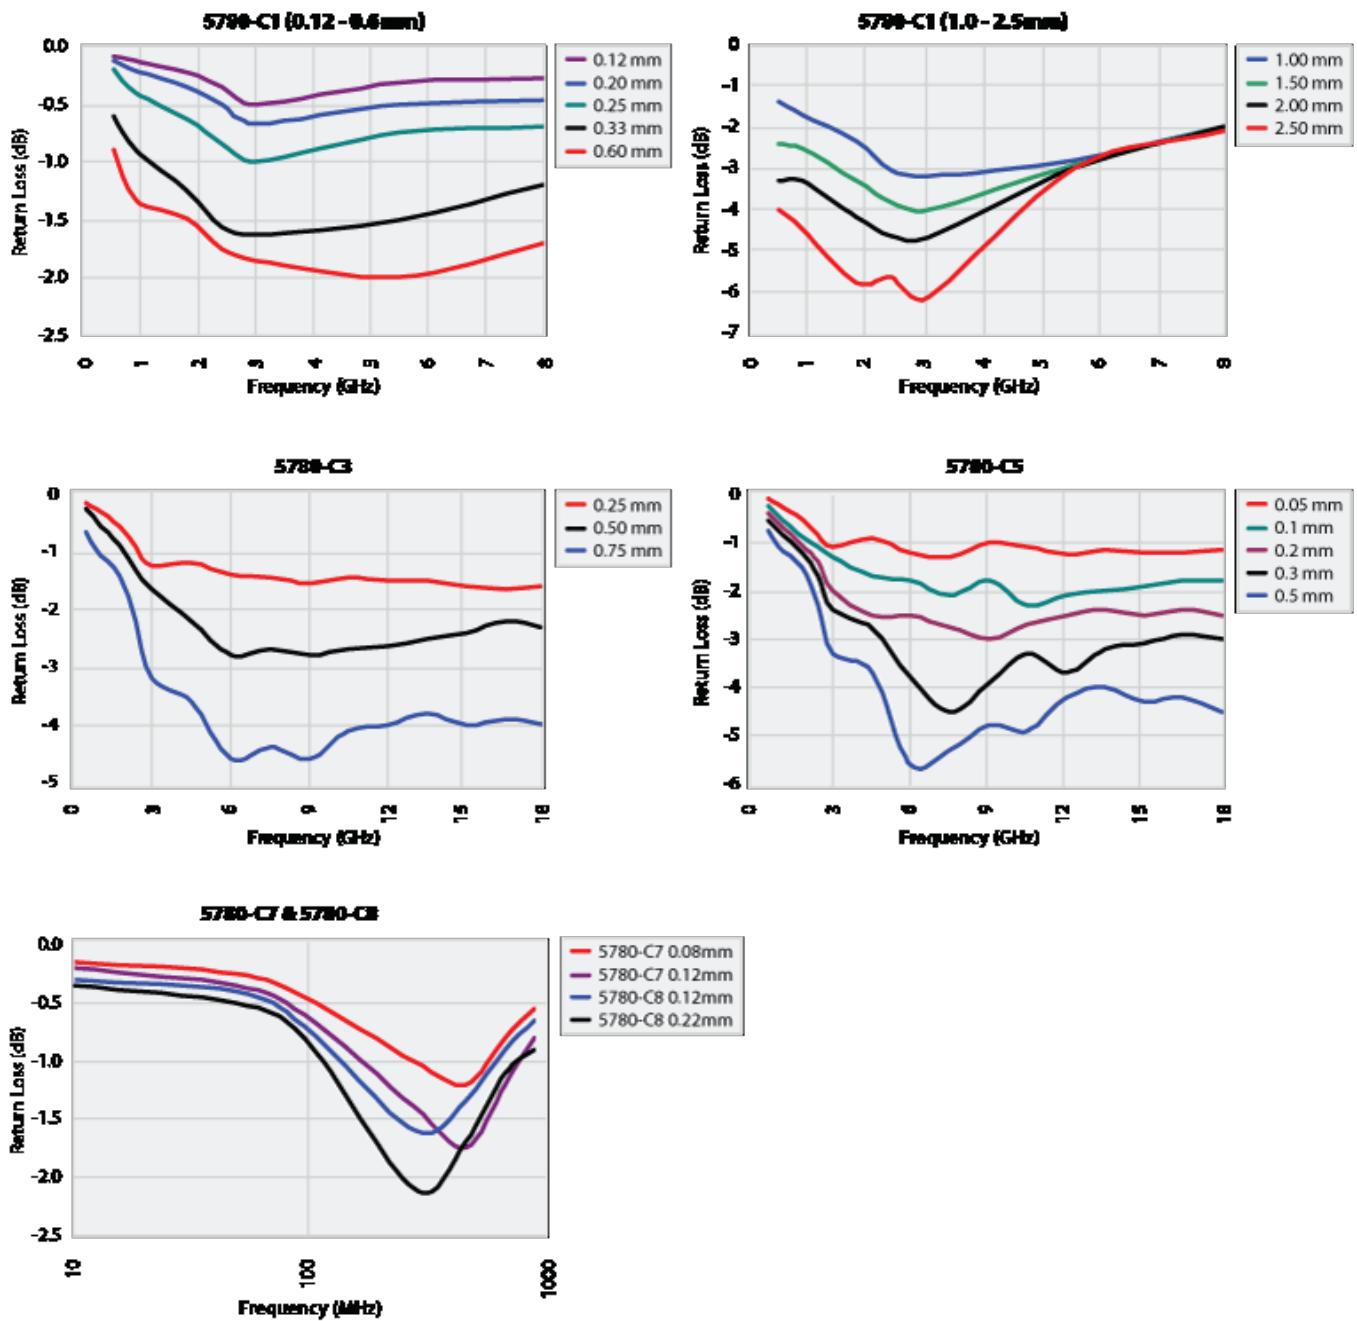

5780 EMI Flexible absorber sheets power loss measurement

5780 EMI Flexible absorber sheets reflection loss measurement

Return loss at a given frequency

5780 - EMI Flexible absorber sheets

5780 EMI Flexible absorber sheets return loss at a given frequency

Pick the right EMI flexible absorber sheet
